Key topics:
- Disease focused (diabetes, TB, HIV)
- Accreditation, lab efficiency and quality management
- Laboratory ethics
- Impact of POCT in changing clinical pathways
- Molecular diagnostics and personalized medicine
- Cytology

What’s new:
- For 2020, the lab track will be split in order to get the maximum number of attendees as possible. There will be a day 1 and a day 2 focus.

Organised by:
